Innovate, manage and increase performance of Your Business
We research, innovate and take quality solutions to you

What we can do for you

We offer and deliver the best solutions for your business.

Why choosing us

Learn our values that distinguish us and make us prominent.

Learn about our experience

Understand why we were chosen by many companies around the world.

INFLOR Forest

Forest Management Systems
Use our technology resources to manage the production chain and monitor your plantation.

INFLOR Agri

Agricultural Management Systems
Manage your properties using our applications on an efficient and simplified way.

INFLOR Mobile

Systems based on Mobile Devices
Access information about the areas, maps and operations directly from the field.

Solution Benefits

- Enables viability analysis and internal return rate (IRR) according to the desired contracting model;
- Management of contracts drafts. The drafts is transformed in templates with the contracts being automatically generated by the system;
- Control of suppliers debt centralizing all advance, payment or receipt to the supplier in one place, being able to check the contract extract at any time;
- Safety control the fulfillment of contracts obligations;
- Automatic calculation of wood purchase through the integration with transport system to receive wood and integration with supplier debt executing the debt discount and calculating the amount to be paid. Possibility of bonus calculation.
- Minimization of tax assessments risks by unconformities generated related to legal demand of environmental agencies;
- Cost reduction related to overpayments of taxes and fees related to land property documents;
- More traceability of the history of a property succession chain.

Main Functionalities

- Land control;
- Legal and non legal contracts control;
- Internal return rate (IRR) calculation;
